Project: Lagos Infrastructure Project -- Nigeria

Sector: Transport -- Road

Project Profile:

The State Government of Lagos, Nigeria has announced a Naira NGN 48 billion (US\$350 million) Lagos Infrastructure Project, a public-private sector participation scheme aimed at the development and improvement of road networks and town infrastructure in Lagos State. This project includes upgrades and construction of major roads and bridges, including the 150 Km Coastal Road, the widening of the Lekki Corridor and the construction of the Fourth Mainland Bridge.

This new asset-urban project is expected to attract private sector financing, whereby private concessionaires would manage the roads for 30 years, instituting tolls for usage. A consortium of 21 private sector companies (including South Africa's Books Global Ltd. and Africon Limited) is undertaking feasibility studies and preliminary engineering designs.
